\* Excluded from Non-IFRS adjusted net earnings are the effects of other charges, which includes the write-down of goodwill and long-lived assets, integration, transaction and consulting costs related to acquisition activities, other solar charges, and the related income tax effect. The company also excludes some recurring charges such as restructuring costs, stock-based compensation, amortization of intangible assets (excluding computer software), and the related income tax effect.

\*\* Excluded from Non-IFRS adjusted EBIAT are the effects of other charges, which includes the write-down of goodwill and long-lived assets, integration, transaction and consulting costs related to acquisition activities, other solar charges, refund interest income, and income taxes. The company also excludes some recurring charges such as restructuring costs, stock-based compensation, the amortization of intangible assets (excluding computer software), and net finance costs.

(1) Non-IFRS Adjusted ROIC is calculated by dividing non-IFRS adjusted EBIAT by average net invested capital. Net invested capital consists of total assets less cash, accounts payable, accrued and other current liabilities and provisions, and income taxes payable. We use a two-point average to calculate average net invested capital for the quarter and we use a five-point average to calculate average net invested capital for the year.

(2) Non-IFRS free cash flow is defined as cash provided by or used in operating activities after the purchase of property, plant and equipment (net of proceeds from the sale of certain surplus equipment and property), finance lease payments, advances to (or repayments from) a former solar supplier, and finance costs paid. Non-IFRS free cash flow for the third quarter of 2015 and fiscal year 2015 also included a cash deposit of \$11.2 million we received upon execution of the agreement to sell our Toronto real property (see note 18 to our December 31, 2016 consolidated financial statements).
